

Software Engineering Lab-2 (JIRA-Scrum Boards)

Name:Sairam Charan N

SRN:PES1UG24AM240

class/sem: AiML/'5-E'

USE case NO:24

1. Epic-1- Real time bus tracking and estimated ETA.

Story_id	User Story	Requirement	priority	Story points
1.1	Collect Real-Time Bus GPS Data	FR-001	High	5
1.2	Calculate Updated Bus ETA	FR-001	High	5
1.3	View Bus ETA at Selected Stop	FR-004	High	3

Epic-2-Bus crowding information

Story_id	User Story	Requirement	priority	Story points
2.1	View Current Bus Crowding	FR-002	High	3
2.2	Receive Ticketing Sensor Data	FR-005	High	3
2.3	Compute and Update Bus Crowding Level	FR-005	High	5

Software Engineering Lab-2 (JIRA-Scrum Boards)

Epic-3-Fleet Monitoring & Operations

story_id	User story	Requirement	priority	Story points
3.1	Monitor Current Bus Location	FR-003	High	5
3.2	Monitor Current Bus Crowding	FR-003	High	3

2.Screenshots of Epics and stories

Epic-1

The screenshot displays the Jira interface for an Epic titled "Enable commuters to access accurate real-time bus locations and estimated arrival times using continuously updated GPS data." The interface is divided into several sections:

- Description:** A text box containing the epic's description: "Enable real-time tracking of buses and provide commuters with updated estimated arrival times for their selected stops using the latest GPS information."
- Attachments:** A section showing a PDF attachment titled "PES1UC24AM2... AB2.pdf" with a timestamp of "01 Sep 2026, 11:09 AM".
- Child work items:** A table listing child items. The first item is "PBLTCE-4 Collect Real-Time Bus GPS Data" with a priority of "High", a story key of "5", and an assignee of "Unassigned".
- Details sidebar:** A sidebar on the right containing fields for Assignee (Unassigned), Reporter (Sai N), Labels (None), Due date (Sep 30, 2026), Start date (Sep 1, 2026), Sprint (PBLTCE Sprint 1), and Priority (Medium).

Epic-2

Software Engineering Lab-2 (JIRA-Scrum Boards)

Spaces / Public_Bus_Live_Trac... / PBLTCE-2

Enable commuters to view the current crowding level of buses and provide up-to-date crowding information.

Description
Enable commuters to view accurate and up-to-date bus crowding information based on passenger and ticketing sensor data, helping them decide whether to take a particular bus.

Child work items 0% Done

Work	Priority	Story ...	Assi...	Status
PBLTCE-8 View Current Bus Crowding	H...	3	Unz	To Do
PBLTCE-9 Receive Ticketing Sensor Data	H...	3	Unz	To Do
PBLTCE-10 Compute and Update Bus Crowding Level	H...	5	Unz	To Do

Epic-3

Spaces / Public_Bus_Live_Trac... / PBLTCE-3

Enable Fleet Controllers to monitor the location and crowding status of active buses for operational management.

Description
Provide Fleet Controllers with real-time visibility into bus locations and crowding levels to support effective monitoring and management of bus operations.

Child work items 0% Done

#QUESTIONS-TO-ANSWER

1. Did your estimations reflect the actual effort?

Ans. Yes, the estimates were fairly accurate. The more complex GPS and crowding tasks required more effort than the simpler display-related stories.

2. Was your backlog well-prioritized?

Ans. Yes, we prioritized the core tracking and ETA features first, followed by crowding and fleet-monitoring features.

3. How did your simulated sprint align with your plan?

Ans. The sprint mostly followed our plan. We completed the selected high-priority stories and moved them through the planned workflow.

4. What insights did the burndown chart give about your team's capacity?

Ans. The burndown chart showed our progress and the remaining work throughout the sprint. It helped us understand whether our workload was realistic and how much work the team could complete.
